ABSTRACT OF THE DISCLOSURE

[A cabbage cutter consisting of a round metal cylinder with a solid top and an open bottom. The solid top of the cutter is covered with a permanently secured cap that extends slightly over onto the sides of the cylinder that acts as a handgrip and also offers cushion to the hand during its use. The open bottom of the cylinder is a sharp, knife-like cutting edge that can be sharpened if it should become dulled from use. A safety cover that fits over the sharp, knife-like cutting edge that acts as a protective shield when the cabbage cutter is not in use or stored.] A kitchen utensil designed specifically to cut and chop cabbage comprising a cylindrical hollow body with a closed top and an open bottom connected by a cylindrical wall. The top is closed and the bottom rim is open. The closed top is covered with a permanently affixed handgrip that extends slightly over onto the wall of the device. The open bottom rim is filed or rubbed down to a smooth, thin, sharp cutting and chopping edge that can be sharpened if it should become dulled from extensive use. The device has a removable protective cover for the cutting and
